

VideoManager main features

VideoManager key features:

- manage your collection of movies
- add movies manually or using online searches
- manage borrowed and lent records
- database and application usable from memory card

AudioManager and **VideoManager** share the same user interface:
[please refer to the AudioManager tutorial.](#)

VideoManager registration

You can try **VideoManager** during a trial period. After this trial period, features are restricted and you need to register to remove limitations. Please support shareware applications! **VideoManager** and **AudioManager** share the same activation code: you can buy either **AudioManager** or **VideoManager** to activate both of them. Existing **AudioManager** activation codes can be used.

VideoManager version history

2009-11-07: VideoManager 0.1.0

- First official public beta release

Last update 2009-11-07
